

Making FAIR data a reality.

PaNOSC builds on and helps making FAIR, EOSC and Open Science a reality for the Photon and Neutron communities.

The project works closely with the photon and neutron sources in Europe to develop common policies, strategies and solutions in the area of FAIR data policy, data management and data services, integrating them into the EOSC.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 823852
